

***Gymnophthalmus underwoodi* (Smooth-scaled Worm Lizard). Distribution.**

Date of observation: 9 September 2009. Location: St. Kitts. Voucher: image. This is the first record of this species for the island of St. Kitts. It has been introduced on other islands in the West Indies. Individuals of this species have been seen in Basseterre and at Camps. Species identification was made by Robert W. Henderson (Milwaukee Public Museum).

Kathleen Orchard, St. Christopher National Trust, P. O. Box 888, Bay Road, Basseterre, St. Kitts, orchards@sisterisles.kn.
