

***Borikenophis portoricensis* (Puerto Rican Racer). Distribution.**

Date of observation: 10 January 2008. Location: Puerto Rico: Cayo Luis Peña. Coordinates: 18.3114, -65.3322. Elevation: 0 m. Voucher: image. This is the first record of the species on Culebrita. The snake was moving in forest leaf litter in a coastal forest. The goats present on the island disturb the leaf litter and eat much of the understory vegetation.
